

Annex 3. Raw data for all CITES export permits issued in 2022

Note: In cases where weight was not recorded, the Specimen Number of Pieces is noted instead. Species Sub-Type gives an overview of what the species may be exported for e.g. *Dendropoma maxima* may be exported as seafood or a shell; the Specimen Part then details which of the two the permit was issued for e.g. shell not seafood. Specimen Source and Specimen Purpose are pieces of information required by the CITES; a Wild source means that the specimen was obtained from the natural environment in the Cook Islands; Specimen Purpose lists whether the permit is for personal, commercial or research purposes.

Scientific Name	Weight (kg)	Specimen Number of Pieces	CITES-Appendix	Specimen Part	Final Destination	Species Sub-Type	Application Date	Specimen Source	Specimen Purpose	Permit Certificate Number
Favites spp.	1.4	0	II	Coral	New Zealand (NZ)	Coral	Jan-22	Wild	Personal	Rar16173
