

KINGDOM OF TONGA

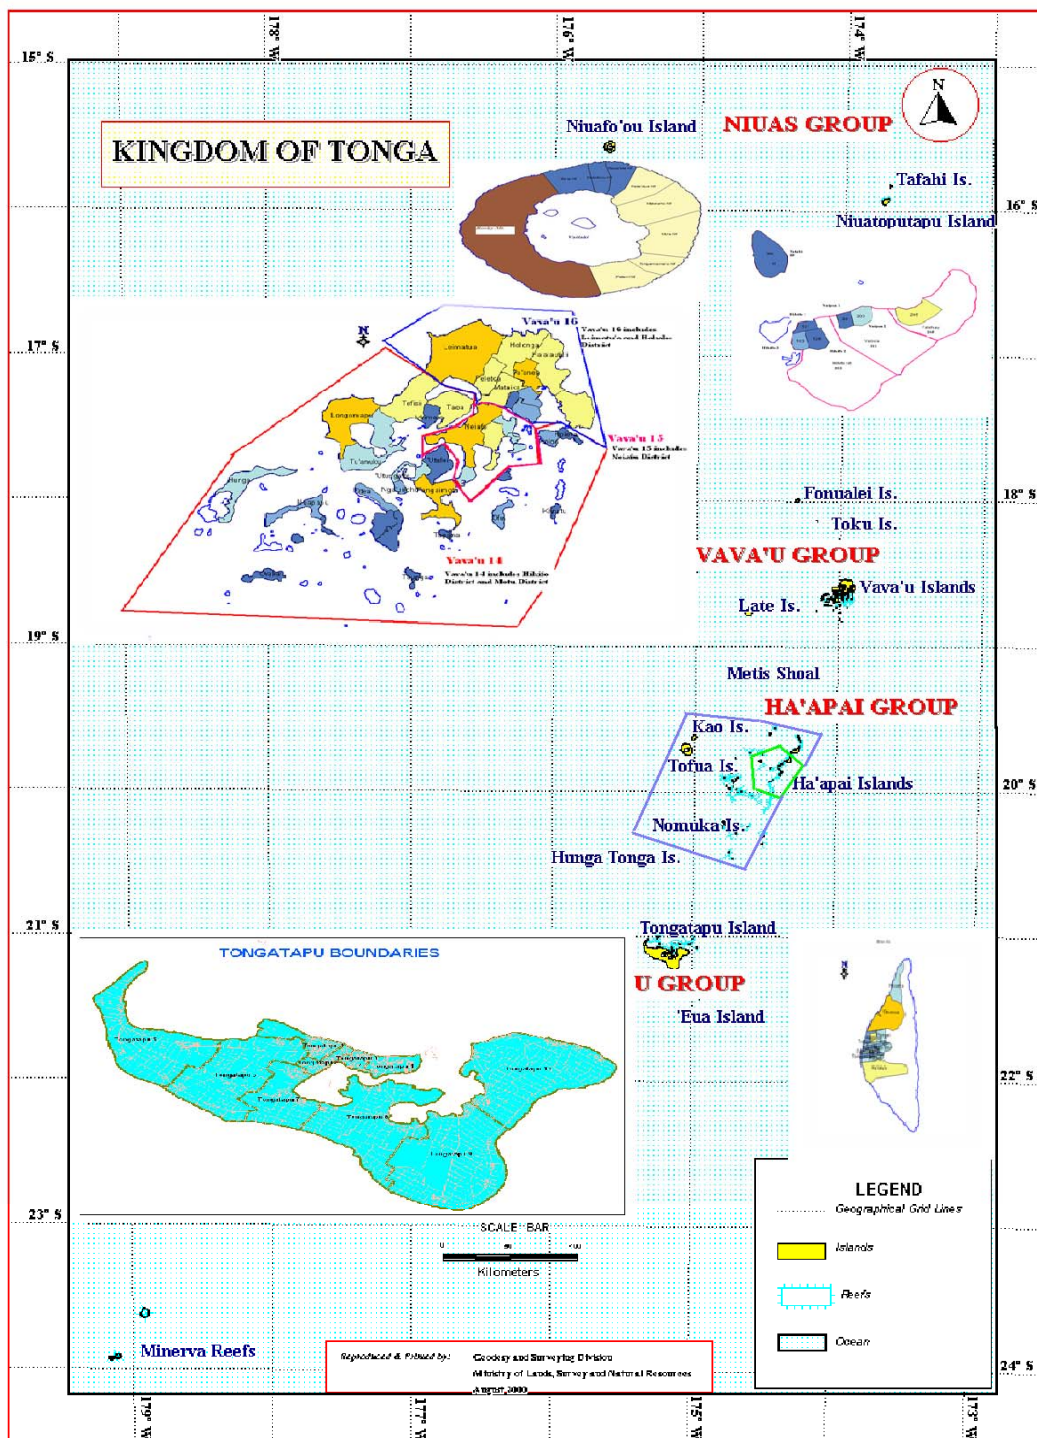

# TONGA 2011 CENSUS OF POPULATION AND HOUSING

## VOLUME 1: BASIC TABLES AND ADMINISTRATIVE REPORT

Statistics Department Tonga  
PO Box 149  
Nuku'alofa  
Tonga  
2013

## **Preface**

This report is the 7<sup>th</sup> population census report of the kingdom since 1956, and the 5<sup>th</sup> census conducted by the Statistics Department. It provides administrative information and basic statistical tabulation of the 2011 Population and Housing Census of Tonga. The census date was midnight, the 30<sup>th</sup> of November 2011. Information incorporated in this report will facilitate the decision makers in Tonga with respect to the current and future socio-economic conditions in the Kingdom.

The substantive information of this report is presented in two parts. Part 1 presents the statistical tables (General Tables and Household Tables) itemizing the data provided in the Analytical report. Part 2 provides the background information on Census 2011.

The 2011 Census was carried out with the support and efforts of many people. These include: Minister of Finance, under whose authority the Census was undertaken: the Chairperson of the Steering Committee, the Secretary of Finance for his leadership and coordination of the Steering Committee, thus making all census activities possible. Thanks also to all the members of the steering committee for their valuable contributions and suggestions in making the census operations work efficiently.

My appreciation is extended to the Secretariat of the Pacific Community (SPC) for all the technical assistance they provided. I also wish to acknowledge to the Australian Government through AusAID's financial assistance because without their support the census would not have happened.

Thanks also to the local businesses including Tonga Power, Tonga Broadcasting Commission and Tonga Communication Commission for their contributions toward our publicity program. My sincere gratitude to the Director of Education for allowing education officers and teachers to enumerate and supervise the 2011 Census, and to all these peoples, your hard work is highly appreciated. I also wish to thank the Census team and the rest of the staff of the Statistics Department for their valuable contributions offered throughout the 2011 Census. Finally, to all the people of Tonga for their generous responses to the questionnaires, your contributions are of vital importance in making Tonga's 2011 Population and Housing Census a success.

Since the improvement of statistical data base of the Kingdom is a continuous function of the Statistics Department, it would welcome any constructive comments and suggestions from user for future improvement of the contents, coverage and the quality of the population census report.

Malo 'Aupito

## Table of Contents

	Page
Preface .....	(i)
Table of Contents.....	(ii)
Abbreviations .....	(v)
Glossary.....	(v)
Key indicators .....	(vii)
Executive summary .....	(ix)

### Part 1: Statistical tables

#### General tables and population trend

<b>Table G1:</b> Total population by sex by division and district (1996, 2006 and 2011).....	1
<b>Table G2:</b> Total households and population by sex by division, district and village (2006 & 2011) .....	2
<b>Table G3:</b> Population growth by division, district and village (2006-2011).....	7

#### Social characteristics and distribution

<b>Table G4:</b> Population density by sex, by division, urban/rural area, and Greater Nuku'alofa .....	12
<b>Table G5:</b> Total households and population by age groups, by division, district and village.....	14
<b>Table G6:</b> Total population by sex, division and single year of age.....	21
<b>Table G7:</b> Total population by sex, by urban/rural areas and Greater Nuku'alofa and by single year of age .....	25
<b>Table G8:</b> Tongan (Tongan & Part-Tongan ethnic origin) by sex, division and single year of age.....	27
<b>Table G9:</b> Total population by 5 year age groups, by division, urban/ rural areas and Greater Nuku'alofa.....	30
<b>Table G10:</b> Total population by ethnic origin, by sex, division, urban/rural area, and Greater Nuku'alofa.....	31
<b>Table G11:</b> Total population by ethnic origin by household type .....	31
<b>Table G12:</b> Total population by ethnic origin, by sex and 5 year age groups.....	32
<b>Table G13:</b> Private household population by sex, division and by single year of age .....	33
<b>Table G14:</b> Total population by marital status by 5 year age groups and sex.....	36
<b>Table G15:</b> Tongan/Part-Tongan population by marital status by sex and age .....	37
<b>Table G16:</b> Private household population by marital status, by sex and age.....	38
<b>Table G17:</b> Total population by religious affiliation, by sex and division .....	39
<b>Table G18:</b> Total population by religious affiliation, by division and district .....	40
<b>Table G19:</b> Total population by religious affiliation, by division, district and village .....	41
<b>Table G20:</b> Religious affiliation by sex and ethnic origin.....	47

#### Internal Migration

<b>Table G21:</b> Total population by place of enumeration and place of birth, this year (in 2011) .....	49
<b>Table G22:</b> Population by place of enumeration and usual place of residence, one year ago (in 2010) .....	49
<b>Table G23:</b> Population by place of enumeration and usual place of residence, five years ago (in 2006) .....	49

#### Disability, health, and smoking habits

<b>Table G24:</b> Population with disability by type and degree and by sex (total responses).....	50
<b>Table G25:</b> Population with disability by type and degree, by division, urban/rural areas and Greater Nuku'alofa and by sex (total responses) .....	50
<b>Table G26:</b> Population with disability by division, urban/rural areas and Greater Nuku'alofa and 5 year age groups (total responses) .....	52
<b>Table G27:</b> Total population with health complaint, illness or injury by sex, division and district .....	54
<b>Table G28:</b> Total population with health complaints, illness or injury who sought care by division, urban/rural areas and Greater Nuku'alofa and by sex .....	55

<b>Table G29:</b> Population (5 years +) smoking cigarettes or tobacco on a daily basis by age and sex .....	56
<b>Table G30:</b> Population (5 years +) smoking cigarettes or tobacco on a daily basis by division and district.....	56

### Education, qualification and literacy

<b>Table G31:</b> Total population (5 years +) currently attending school or other education by type of school, sex and by age .....	57
<b>Table G32:</b> Total population (5 years +) currently attending school or other education by type of school, by division, urban/rural areas and Greater Nuku'alofa and by age .....	58
<b>Table G33:</b> Highest level of schooling by age (5 years +) and by division, urban/rural areas and Greater Nuku'alofa .....	61
<b>Table G34:</b> Highest level and grade of schooling completed (5 years +) by 5 year age groups and sex .....	64
<b>Table G35:</b> Currently attending school or other education (5 years +) by highest level and grade of schooling completed, by 5 year age groups and sex .....	65
<b>Table G36:</b> Not currently attending school or other education (5 years +) by highest level and grade of schooling completed by 5 year age groups and sex .....	66
<b>Table G37:</b> Qualification achieved (population 5 years +) by sex and by division, district, village, urban/rural areas and Greater Nuku'alofa (2011).....	67
<b>Table G38:</b> Qualification achieved (population 5 years +) by age and sex .....	74
<b>Table G39:</b> Currently and not currently attending school or other education by qualification achieved (population 15 years +), by sex and age .....	78
<b>Table G40:</b> Currently attending school or education (population 15 years +) by qualification achieved, by sex and age... 79	
<b>Table G41:</b> Not currently attending school (population 15 years +) by qualification achieved, by sex and age.....	80
<b>Table G42:</b> Literacy (population 5 years +) by sex and 5 year age groups .....	81

### Labor market activity

<b>Table G43:</b> Labour market activity (population 15 years +) by division, urban/rural areas and greater Nuku'alofa.....	85
<b>Table G44:</b> Labour market activity (population 15 +) by 5 year age groups .....	87
<b>Table G45:</b> Detailed type of work (employed population 15 years+) by 5-year age group and sex .....	89
<b>Table G46:</b> Principal occupation (population 15 years +) by division, urban/rural areas and Greater Nuku'alofa.....	91
<b>Table G47:</b> Principal occupation (population 15 years +) by 5 year age groups .....	93
<b>Table G48:</b> Principal occupation (temporarily employed population 15 years +) by age and sex.....	95
<b>Table G49:</b> Principal occupation (employed population 15 years +) by sex, division, urban/rural and Greater Nuku'alofa 97	
<b>Table G50:</b> Main activity of employees' employer (population 15 years +) by division, urban/rural areas and Greater Nuku'alofa .....	98
<b>Table G51:</b> Main activity of employees' employer (for employed population 15 years +) by 5 year age groups.....	101
<b>Table G52:</b> Population (15 years +) who are economically and not economically active (includes unemployment).....	105
<b>Table G53:</b> Population (15 years +) who are economically and not economically active (includes unemployment).....	114
<b>Table G54:</b> Population (15 years +) who are economically and not economically active (includes unemployment).....	123

### Unpaid Work

<b>Table G55:</b> Unpaid work activity (population 15 years +) by division, urban/rural areas and greater Nuku'alofa.....	132
<b>Table G56:</b> Unpaid work activity (population 15 years +) by 5 year age groups.....	133

### Electoral Voters

<b>Table G57:</b> Voting status (population 22 years +) by division, urban/rural areas and greater Nuku'alofa.....	134
<b>Table G58:</b> Voting status (population 22 years +) by 5 year age groups.....	134
<b>Table G59:</b> Location in the next three years (population 22 years +) by division, urban/rural areas and Greater Nuku'alofa .....	135
<b>Table G60:</b> Location in the next three years (population 22 years +) by 5 year age groups .....	135

## Fertility

<b>Table G61:</b> Number ever given birth (female population 15 years and over) by age and division .....	136
<b>Table G62:</b> Number of children ever born and number of children died to female population 15 years + by division, and urban/rural areas and Greater Nuku'alofa .....	139
<b>Table G63:</b> Number of children by place of residence to female population 15 years + by sex, division and urban and Greater Nuku'alofa .....	142
<b>Table G64:</b> Number of children born in the 12 months before census night (1 Dec 2010 to 30 Nov 2011) to female population (15 years+) by 5 year age group of mother.....	145

## Household Tables

<b>Table H1:</b> Number of households by type and sex of head, by division, district, village, urban/rural areas and Greater Nuku'alofa .....	146
<b>Table H2:</b> Private households by size, sex and ethnic origin of head, by division, urban/rural areas and Greater Nuku'alofa .....	150
<b>Table H3:</b> Private households by size and sex and ethnic origin of head, by division .....	153
<b>Table H4:</b> Construction material used for outside wall of main dwelling by division, district, village, urban/rural and Greater Nuku'alofa (private households) .....	157
<b>Table H5:</b> Construction material used for the roof and floor of main dwelling by division, district, village, urban/rural areas and Greater Nuku'alofa (private households) .....	161
<b>Table H6:</b> Source of drinking water and water apart from drinking water by division, district, village, urban & rural areas and Greater Nuku'alofa (private households) .....	165
<b>Table H7:</b> Private Households that have solar or electricity hot system, shower or bath, and toilet by division, district, village, urban/rural area and Greater Nuku'alofa .....	169
<b>Table H8:</b> Main source of toilet facility by division, district, village, urban/rural areas and Greater Nuku'alofa (private households) .....	173
<b>Table H9:</b> Main source of lighting and energy for cooking by division, district, village, urban/rural areas and Greater Nuku'alofa (private households) .....	177
<b>Table H10:</b> Goods in the household by division, urban/rural areas and Greater Nuku'alofa (Private households, 2011) .....	184
<b>Table H11:</b> Household access to internet by division, district, urban/rural areas and Greater Nuku'alofa (private households) .....	184
<b>Table H12:</b> Main means of waste disposal by division, district, village, urban/rural areas and Greater Nuku'alofa (private households) .....	185
<b>Table H13:</b> Household tenure by district, urban/rural areas and Greater Nuku'alofa (private households).....	189
<b>Table H14:</b> Main source of household income by division and district (private households).....	190
<b>Table H15:</b> Main source of household income by district, village, urban/rural areas and Greater Nuku'alofa (private households).....	191
<b>Table H16:</b> Main source of income by sex and ethnic origin of head of household, by division, urban/rural areas and Greater Nuku'alofa (private households) .....	195
<b>Table H17:</b> Remittances received by division and district, village (private households) .....	197
<b>Table H18:</b> Frequency of remittances received by sex and ethnic origin of head of household by division, urban/rural areas and Greater Nuku'alofa (private households) .....	202
<b>Table H19:</b> Number of deaths in household during the 12 months before the census by sex and division, district, village, urban/rural areas and Greater Nuku'alofa .....	204

## Part 2: Census 2011 background

<b>1.1 Introduction</b> .....	208
<b>1.2 Census history</b> .....	208
<b>1.3 Census planning and management</b> .....	209
<b>1.4 Administrative Framework</b> .....	209

## Glossary

Census	The total process of collecting, compiling, evaluating, analyzing and publishing or otherwise, disseminating demographic, economic and social data pertaining, at a specified time, to all persons in a country or in a well-delimited part of a country.
Division	The five 'main islands' (Tongatapu, Vava'u, Ha'apai, 'Eua and Ongo Niua) in Tonga. Each division is divided into districts and each district is divided into villages.
Economic activity	The main activity each person aged 15 years and older did during the reference week.
Economically active	People who were either engaged in a full or part-time job or in a business, engaged mainly in farming, fishing or handicrafts making, or mainly in housework with some gardening or farming, fishing or making handicrafts, who had a job but were on leave or temporary absent for some reason, and the unemployed.
Employed	Those who 'work for pay' or 'work to support the household by producing goods mainly for sale', or 'work to support the household mainly for own consumption.
Ethnic origin	Relates to the ethnic group a person belongs to, (i.e. the ancestry with which he/she is identified).
Greater Nuku'alofa	Greater Nuku'alofa includes the districts of Kolofo'ou and Kolomotu'a.

Household	Consists of persons who usually eat together and share the work of preparing the food and/or the cost of work of providing it. Generally, household members live and sleep in the same building although this is not always the case. Hence, the definition is based on eating together rather than on living or sleeping in the same building or dwelling.
Household head	The person with the primary authority and responsibility for household affairs. This person is usually designated by the members of the household.
Industry	The main activity undertaken by the establishment or place where a person worked. Industry affiliation was classified according to the International Standard Industrial Classification (ISIC) Revision 4_2004.
Institution	A place of residence apart from private household, such as hotel/motels, hospital and prison.
Literacy	Measured as a respondents' ability to read and write a simple sentence in Tongan, English or another language.
Non-resident institution	Includes non-residents occupying an institution on Census night.
Not economically active	People who were neither employed nor unemployed. This includes those engaged in housework only, full time students, the retired, the disabled and other.
Nuku'alofa or urban	Includes Kolofo'ou, Kolomotu'a and Ma'ufanga villages.
Paid work	The work a person carries out in order to gain wages, salaries or cash.
Place of birth	The village in which a person was born. Where a mother travels to another area, e.g. to a hospital, or another country to give birth, the village or country in which she usually resided at the time she gives birth is the child's place of birth.
Place of usual residence	The geographic place where the enumerated person (a) has lived for the past six months or more, or (b) having arrived in that geographic area during the last six months and intends to stay for at least six months.
Remittances	Money sent to households from friends or relatives living overseas or within Tonga.
Resident institution	Includes Tongan residents who were occupying an institution on Census night.
Rural	All villages except Kolofo'ou, Kolomotu'a and Ma'ufanga villages.
Total population	Census night population, i.e. including residents and non-residents in private households, residents in institutions and non-residents in institutions.
Unpaid work	Any work a person voluntarily did whether it be for the family, church or the community, or any other related organization and for which no compensation was paid.
Urban population	Total population of the villages of Kolofo'ou, Ma'ufanga and Kolomotu'a. Urban boundaries are defined based on the size of village population i.e. villages with a population size of at least 5,000 people.
Unemployed	Those that did not work in the previous week (other than those who had a job but were not at work during the reference week), but spent some time looking for work and were available to work if a job was offered to them.

**Note:** \*Consistent with international definition of unemployed, it includes those who did not work but were looking and available to work

\*\* Adjusted to also include discouraged workers

\*\*\* Adjusted to also include subsistence and discouraged workers

Discourage workers includes those who believed no work was available, or because of weather conditions, or could not afford transport costs

## Executive summary

The 2011 Census of Population and Housing provides a snapshot of the Tongan population and elicits detailed demographic, social and economic trends.

### Population and demographic trends

In 2011, the total population in Tonga was **103,252**, compared to 101,991 people in 2006. This represents an increase of 1.2% or 1,261 people between 2006 and 2011, and an average annual growth of 0.25% or 252 people per year. It should be noted that this is the census night population, which includes residents living in private households and institutions as well as non-residents living in institutions.

The usually resident population (living in private households and institutions) was **103,043**.

Of the 103,252 people on census night, 51,979 were male and 51,273 were female. This gives a sex ratio of 101 males per 100 females.

Tonga has a relatively young population, with a median age of 21 years. More than one third (39%) of the population was aged 15 years and younger, while only 8% were 60 years and older.

Tongatapu's population was 75,416, constituting 73% of Tonga's total population. This has increased from 71% in 2006.

The urban population was 24,229 (23% of the total population). The urban population includes the villages of Kolofo'ou, Ma'ufanga and Kolomotu'a, which make up Nuku'alofa in Tongatapu.

The average population density was 159 people/km<sup>2</sup>. However, this varies widely across island division and districts. For example, the population density in Tongatapu was 290 people/km<sup>2</sup> compared to only 18 people/km<sup>2</sup> in Ongo Niua.

### Religion

Free Wesleyan Church is the dominant religion in Tonga, with 36% of the population affiliated to this church. This is followed by the Church of Latter Day Saints (18%), the Roman Catholic Church (15%), and the Free Church of Tonga (12%).

### Health

During the two week period prior to the census, 5,038 (or 5%) of the total usually resident population reported having a health complaint (illness or injury). Of these people, 98% sought care, while 2% (80 people) did not seek care. Of those who sought care, the majority went to a public hospital. The main reasons for not seeking care were not ill enough, could not afford treatment, too far to travel, service at provider is poor and too busy.

For the usually resident population aged five years and older, 19% reported that they smoked on a daily basis (compared to 21% in 2006). Of those who smoke daily, 79% are males compared to 21% for females. The proportion of youths smoking daily, especially young males, is high. 20% of males aged 15-19 years and 46% of those aged 20-24 years smoked daily, compared to 3% and 11% for females respectively.

## **Education**

94% of the usually resident populations aged 5 - 14 years were enrolled in school on census night. School attendance rates decreased rapidly after the age of 15, with 29% of those aged 15-19 years not attending school on census night. In general, female school attendance rates were higher than male attendance rates across all age groups.

Of the usually resident population aged 15 years and over, 8% had only achieved primary school education. Three quarters of the population had secondary level education, and 16% had a higher level education (including technical/vocational and university). Higher education levels were higher in urban areas compared to rural areas.

## **Literacy**

Literacy was measured by a respondent's ability to read and write a simple sentence. The literacy rate for those aged five years and older in the usually resident population was 98.2% in 2011. Of those who are literate, 86% were literate in both Tongan and English or other languages, while 11% were literate in Tongan only.

Literacy in the Tongan language is over 98% for all age groups. However, literacy in both Tongan and English languages decline with age. 94% of those aged 10-19 years are literate in both Tongan and English, compared to only 56% of those aged 75 years and over.

\*Includes those who had a job but did not work last week.

\*\*Consistent with international definition of unemployed, it includes those who did not work but were looking and available to work.

^ Includes those who believed no work was available, or because of weather conditions, or could not afford transport costs.

**Table G53: Population (15 years +) who are economically and not economically active and unemployment including discouraged workers by 5-years age group, sex, division, urban/rural areas and Greater Nuku'alofa**

Age	Total population (15 yrs +)	Economically active/in the labour force									Not economically active/not in the labour force					
		Total active	Employed				Unemployed				Total not active	Attending school	Retired/ too old	Disabled	Home responsibilities /domestic duties	Other *
			Total	Paid work	Subsistence work	Work unspecified *	Available/ looking for work	Discouraged workers^	Total unemployment **	Unemployment rate (%)

## Part 2: Census 2011 background

### 1.1 Introduction

The Census is the official count of population, dwellings and households in Tonga and it provides a 'snapshot' of the country at one specific point in time: 30<sup>th</sup> of November 2011. A Tonga Census has been taken once in every ten years since 1956.

The census provides a unique source of detailed demographic, social and economic data relating the entire population and its most precious resource of its people. This information is used for policy making and planning, monitoring and evaluation, research and other decision-making.

The census is often the primary source of information such as used for allocation of public funding, especially in areas such as health, education and social policy. The main users of this information are the government, local authorities, education facilities (such as schools and tertiary organizations), businesses, community organizations and the public in general.

This population census 2011 is the first population census by 5 year interval or after 5 years from the previous census in 2006. This was requested by the Electoral Boundary Commission (EBC) according to its Act 2010. Of this Electoral Boundary Commission Act 2010, Section 21 (1) & (2) states;

- (1) To facilitate the second determination of boundaries under this Act, the Minister responsible for the administration of the Statistics Act shall cause a **general population census** to be carried out before the **next General Election**.*
- (2) The Government Statistician shall certify and provide to the Commission such information, calculations and projections that the Commission may require to enable it to perform its functions under this Act.*

The next General Election noted in section 21 (1) above will be in November 2014. In a meeting of the EBC in February 2011, they requested the Statistics Department for a possibility to undertake a general population census as also noted in section 21 (1) above. Thus, the SD considered this request not only to meet the EBC request, but also for the benefit for the Kingdom as a whole. Then, SD therefore agreed such census to be held on 30 November 2011, despite a time constraint for a population census preparation, whereas the following advantages were also considered;

- (i) Most of SD staff members involved in the previous population census 2006 are still with SD, thus less training and less census preparation,
- (ii) Population figures needed by EBC be available for its function well in advance the next General Election in November 2014,
- (iii) Population census 2011 is a 5 years after the previous census in 2006, provides up-to-date information compares to 10 years censuses information,
- (iv) SD to continue with 5 years interval population censuses, rather than 10 years interval.

### 1.2 Census history

The 2011 Census was taken under the authority of Section 8 of Statistical Act (1978) *Chapter 53*, which empowers the Minister of Finance to make regulations necessary to conduct the population Census. This regulation was approved by the Cabinet and cited as Census Regulation 2011. The Census regulations also indicate that the Government Statistician is responsible for the administration and completion of the Census. In addition, the regulations enabled the Statistics Department to carry out the necessary activities required to plan, manage and implement all the necessary Census activities.

Censuses of population were first taken in England and Scotland in March 1801, Ireland in 1811 and Australia in 1828. The first New Zealand Census was undertaken in 1851. A national population census has been taken in Tonga since 1921, although there were counts as early as 1891. After World War II, censuses in Tonga were taken regularly once in every ten years beginning in 1956, with the previous one in 2006. In 2011 Census of Population and Housing was the first time to conduct Census in a five-yearly interval.

### **1.3 Census planning and management**

From a planning and management perspective, the Census had two main objectives. Firstly, it was to ensure that the process of collecting, compiling, evaluating, analyzing and disseminating of demographic, economic and social data was conducted in a timely and accurate manner. The development of procedures and processes for the 2011 Census of Population and Housing made use of the lessons learned in previous censuses, and built upon recommendations for improvements.

Secondly, it was a valuable opportunity for building the capacities of employees of the Statistics Department (SD), thus resulting in enhancing the image, credibility and reputation of the Department and at the same time, strengthening its infrastructure. Emphasis was placed on having a senior staff with a wide perspective and leadership qualities.

Through the use of vision, planning, coordination, delegation of responsibility and a strong team spirit, the census work was conducted in an effective and efficient manner. Staffs at all levels were encouraged to have an innovative mindset in addressing issues. Incentives for other parties to participate, both within and outside the government, were encouraged. As a result, the wider community including donors such as AusAID, the Secretariat of the Pacific Community (SPC) in Noumea, that provided the technical assistance and the general public, were able to support the census project.

Data consistency between censuses was an important consideration in the overall census planning. Demands for and the use of data, improvement in data accessibility and analytical tools were also considered.

Extensive and detailed planning is needed to conduct a successful census. Areas that required planning include: enumeration procedures and fieldwork, public communication, data processing and output systems, mapping and the design of census block boundaries, dissemination procedures, content determination and questionnaire development and training. These aspects, and how they interacted with each other, played a crucial role in determining the quality of all of the census outputs. Each phase therefore required careful, methodical planning and testing. The details of such activities, and their implementation and responsibilities were assigned to 5 sub-committees composed of staff members of the SD.

### **1.4 Administrative Framework**

#### **1.4.1 Government Approval**

The SD first sought the Minister of Finance's approval to conduct this census. Once, this approval was received, the census proposal was prepared with assistance of the SPC in Noumea. The proposal was submitted to the Minister of Finance for endorsement to the Cabinet with the recommendations (a) for this census to be taken on the mid-night of 30 November 2011, and (b) SD to continue undertaking future population censuses at 5-year intervals. These recommendations were both approved by Cabinet on 28 April 2011.

#### 1.4.2 National Census Steering Committee

The National Census Steering Committee (NCSC) consisting of the Head of both Government and Non Government Organization was started early 2011 to oversee the overall national census operation under the chairmanship of the Secretary for Finance with the Government Statistician (GS) as secretary. The census steering committee was a high level committee that approved and endorsed the plans and activities of the census. Policy issues that needed to be addressed were submitted to the steering committee for approval prior to the census team and sub-committees designation of the activities necessary to address the tasks.

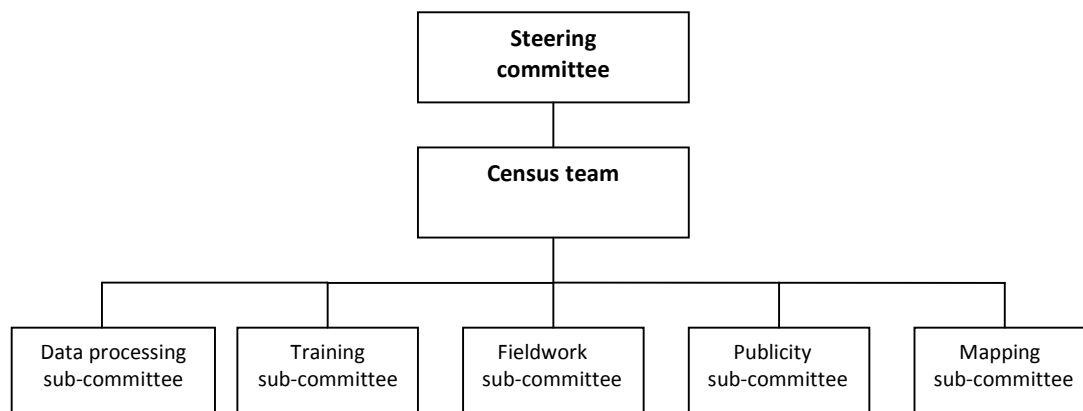

##### Members of the Steering Committee:

Chairperson - Secretary of Finance  
 Vice-Chairperson – Director of Education  
 Secretary for Lands, Survey & Natural Resources  
 Director of Health  
 Director of Agriculture  
 Governor of the National Reserve Bank  
 Secretary of Labour, Commerce and Industries  
 Deputy Secretary, Prime Minister Office  
 Secretary General, Langa fonua 'a fafine Tonga  
 Chief Registrar, Supreme Court  
 Manager, Chamber of Commerce and Industries  
 President of TANGO (Tonga Association of NGOs)  
 Secretary - Government Statistician

#### 1.4.3 Organizational structure of the Census

A census organizational structure is designed to implement a number of interrelated activities. Each of these activities was assigned to a specific sub-committee. The census manuals provided guidelines on processes, organizational structures, controls for quality assurance and problem solving. The challenge for managers was developing a work environment that enabled census personnel to perform all these tasks with a common goal in mind. Each sub-committee was responsible for its own outputs, and specific decisions for specific situations were delegated to the lowest level possible. Problem situations beyond the scope of the sub-committee were escalated to the next higher level.

##### Organizational structure of the Census bodies

The Census Committee (consisted of all sub-committee leaders plus the GS, and chaired by the Assistant Government Statistician (AGS) who was the officer in charge of all management and planning of the Census 2011 operations.

There were five sub-committees. Each sub-committee consisted of about 5 members and were chaired by their Sub-committee leader. These committees included: Mapping, Publicity, Fieldwork, Training and Data Processing. In this way, every staff member of the SD was involved with the census operation through their participation on these committees.

Initial planning of the 2011 Census involved establishing a work-plan with specific time frames. All activities that were to be undertaken and their impact and dependencies on other activities were listed. These time frames were an essential part of the overall exercise as they provided specific guides to the progress of each area and alerted sub-committee team leaders (TL) to areas where problems existed and needed to be addressed. The plan also provided the SD staff with a clear indication of where and how their roles impacted the overall Census process.

Monitoring of the timeframe was an essential part of the management of the Census program. Initially, weekly meetings were held which involved the GS, AGS and team leaders (TL) of the Census committee. As the Census projects progressed, the AGS and TLs met regularly with their sub-committees to report on the progress of each area. Decisions were made on necessary actions in order to meet the designated dates. Potential risks that could negatively affect the deadlines and actions to be taken were also considered at these meetings.

For the 5 sub-committees, one of their first tasks was to verify and amend their terms of reference using the “Strengths, Weaknesses, Opportunities and Threats” (SWOT) analysis methodology, as it applied to past censuses. Each committee then prepared a work-plan and listed all activities for which that particular sub-committee was responsible. This listing included the assignment of a responsible person together with the timeline indicating the start and end dates required to complete that particular activity. These work-plans set up by all the 5 sub-committees were then used by the census operation to develop a detailed operational plan for all phases of the census.

#### **1.4.4 The mapping**

This committee’s mandate was to ensure that good quality maps were produced. The objective was to ensure that the maps provided complete coverage of the country, and designed to accommodate a reasonable workload of one census enumerator per census block.

Collaboration with the Ministry of Land, Survey and Natural Resources (MLSNR) began in preparation for 2006 Census to ensure that digitized maps for Tonga could be used. In preparation for Census 2011, Mr. Scott Pontifex visited from the Secretariat of the Pacific Community (SPC) in Noumea to assist in ensuring that quality satellite and digitized maps would be available.

Updates were made after Census 2006 and before Census 2011. Census Block boundaries were re-designed by merging or splitting existing census blocks to achieve an average of 50 households per census block.

Various updates within the census block maps were made. These included the names of the head of household; roads and other landmarks to ensure that current and accurate information was provided to the enumerators. Reliable maps, both for enumerators and supervisors are necessary ingredients to assist in avoiding any under or over – counting during enumeration. Included in the package of maps was: PCmap1 which indicated where the census block was located; PCmap 2 indicating details about the boundaries of the census blocks, along with the numbers of the households within the block; and a list of the head of each household on the map.

#### 1.4.5 Pre-listing of households

The purpose of the pre-listing of households for this population census is to establish a firm framework in which the rest of the Enumeration can be undertaken. It is a most important part of the population census and it is essential that this part be done as carefully as the rest of the census enumeration. A pre-listing carefully done before the census prevents later errors and confusion and makes the later stages of the enumeration easier.

The Household is the major grouping unit used in this census. It is composed of the other major units of enumeration, the Individual. What, then, is a Household? It is defined here as **“Those persons who usually eat together and share the work of preparing the food and/or the cost or work of providing it.”** Normally household members also live and sleep in the same building but experience has shown that this is not always so, which is why the definition is based on eating together rather than on living or sleeping in the same building.

As an example, take a family consisting of a father, mother, and teenage unmarried son, an adult married son and his wife and two small daughters. If they share eating arrangements they should be enumerated as one household. This would remain true even if the father works as a night watchman and does not sleep at home six nights a week, or if the teenage son often spends the night away who knows where. It also remains true if, for instance, on census night the men in the household spend the night fishing and stay on a small island offshore in a temporary shelter and return home next morning.

If the adult son, his wife and two small daughters live in another house and maintain their own eating arrangements they are a separate household - even if the houses are adjacent and the two families are on the closest possible terms. If the adult married son and his family live in another house but normally eat with the parents and the rest of the family, they remain one household.

A household may be found in a variety of forms. It may spread over more than one building. Members of a family may sleep in two or even more buildings but share one place to cook and eat. They should be enumerated as one Household. Two or more households can be found in one building. Two or more families who share the same building but who do not normally prepare food and eat together should be enumerated as two households, e.g. blocks of flats or servants who have their own quarters. Households may be found in buildings intended primarily for other purposes. A family may live in the back of their shop for instance. Boats tied up to a dock or even pulled up on shore may be permanently lived in and be counted as Households. Enumerators should look out for such dwellings and enumerate their occupants as a household if they meet the definition.

In doubtful cases, instead of grouping people into one Household who should perhaps be separated, it is better to use two households.

Some households will be based in Institutions such as hotels, dormitories, prisons or military institutions. An Institution, for census purposes may be defined as an organisation providing specified services or performing some general function for a group of residents or inmates who will normally be unrelated to each other. In listing households for these Institutions the common eating arrangement still applies, so that it is possible, for instance, that more than one household will occur in the grounds of one Institution. Where a group of unrelated, institution-based persons have common eating arrangements, they should be treated as one Household and the Head of Household identified as the one who has administrative responsibility, supervises or, by common consent, seems to have some leadership authority.

#### **1.4.6 The publicity**

This committee's responsibility was to ensure that the general public understood the benefits of the census, why each person was required to take part and to know how, when and what they needed to do to take part.

The task of striving to obtain an understanding and the cooperation of every individual in the country through effective use of publicity was of great importance for the quality of responses required by the Census. To achieve this, the publicity sub-committee established a publicity framework. This included the use of TV, radio programs, newspaper, IDs, and Census banners.

TV and radio programs were first presented by the Minister, GS and AGS on the 10<sup>th</sup> of August 2011, and then ran every week before and during the census collection period. They were used to inform the general public about the progress and the need for cooperation on the census. During the last two weeks just prior to the enumeration, these programs were used to brief the people of Tonga about the nature of the questions that they would be asked.

Spot advertisements were placed and completed sample versions of the questionnaire forms were published in all the newspapers in Tonga. This ensured that everyone had the opportunity to read and understand the instructions regarding the completion of the questionnaires before the enumeration began. The TV and radio stations followed up with a briefing on the correct meaning of the questions on the forms. The general aim of this activity was to minimize the response burden by allowing the general public to have access to, and to be briefed, on the questionnaire before the actual enumeration.

Banners were used to display the Census slogan, '**Remember to be counted**', and the dates of enumeration period and census night. Similarly, T-shirts were printed with a similar content as the banners to promote awareness about the Census. Radio programs directed specifically towards the teachers were also used for publicity to assist in informing teachers who were involved in training and other programs.

#### **1.4.7 The training**

This committee managed the preparation of various manuals, including the enumerators', supervisors' and questionnaire manuals. These activities commenced with the draft questionnaire form and amendments were made as the questionnaires were updated.

The structure and implementation of the training program was managed mainly by the training and fieldwork sub-committees. This was to ensure that the training program in addressing a particular area of work included adequate reference to other related areas since there was substantial interaction among the different areas of work.

One week training sessions were conducted throughout the Kingdom following the training of the trainers. These sessions were divided into 4 to 5 day sessions in each training center. During the training, teachers were given forms to test enumerating two households and then correct the forms using group discussions the next day. This session was also used to recap any queries especially with the questionnaire forms that may have arisen during the interim period.

Also, telephone lines were established in the head office for teachers to call for clarification on any problem encountered during this process.

Training sessions for the outer islands were conducted close to the enumeration period, when training officers moved from the main islands with all necessary materials for training and enumerations. This was to minimize traveling expenses, since officers from SD spent about 6 – 8 weeks in the islands carrying out training and enumeration activities.

#### **1.4.8 Fieldwork**

This committee set up a hierarchical structure with clearly defined roles and responsibilities to assist in managing the field work. Quality assurance was assured whereby the reporting system went from the enumerator to the field supervisor, district manager and census manager then finally, to the GS and Steering committee as required.

The selection of Enumerators and Supervisors was made from primary school teachers. Where possible, the teacher who resided or close to a particular census block was the enumerator of that block. This was an additional asset due to the local knowledge of the teacher about the census block boundaries and its residents.

The enumeration procedures were publicly announced on the first day of the enumeration, the 28<sup>th</sup> of November, noting that the responsible enumerator should visit all households. This first visit was to update the household listings. The enumerator and the head of the household were to arrange a mutually convenient time for enumeration to take place during the enumeration period, from the 28<sup>th</sup> of November to the 9<sup>th</sup> of December. This was to ensure that the enumerator minimized repeated visits to the households and that the households would be prepared and available to spend enough time to answer the questions. In addition, if a household was not visited, then one of the household members was asked to contact the SD so that it could ensure that the responsible enumerator followed up.

On the other hand, if a household was visited more than once within this period, then, the household should contact the SD for clarification and to prevent over counting by having a household enumerated twice.

Members of the fieldwork and training sub-committees ensured through quality checks the careful process of printing, procurement, distribution and the collection of forms. In addition, the training materials (enumerators and supervisor's manuals, questionnaire manuals, and field visits records) were managed in the same way.

Several decisions regarding printing were made early in the planning process, including confirmation of the timetable for the delivery of forms to the printers, the completion date of printing, the number of questionnaires to be printed, the numbers and addresses of field locations, and the start and end dates of field enumeration. Printed materials were also needed for various tests that were carried out as well as for the training of field staff. The organization of transportation especially to the outer islands was made on time and according to schedule. Communications were assisted by good weather conditions.

#### **1.4.9 Data processing**

The data processing team undertook the task of validating the responses where necessary and converting them into data for processing. It was necessary that the various phases of the data processing were planned and implemented to ensure that the questionnaire was designed and formatted to permit accurate and complete data capture. Field checks and record forms were used for checking, verification and recording during the enumeration. Quality assurance procedures, such as those described above, were implemented to ensure that the data was recorded accurately so as to minimize any inconsistency. This was especially relevant in the interactions between Supervisors

and Enumerators during the field operation. It was also used to produce a quick preliminary total population count, which was released before Christmas of 2011.

The designing of data entry screens, data dictionaries, edit specifications, batch edits, tabulation plans and all related data processing systems were implemented comprehensively and according to schedule. During these processes, the SPC data processing technical advisor, Ms Leilua Taulealo worked closely with the Data Processing Team in providing technical assistance where necessary. In addition, coding manuals were devised to code the relevant questions as part of the data processing exercise. During these activities, recontact with households with problem forms was conducted either by phone or personal contact to ensure that the responses on the questionnaires were as accurate and reliable as possible. Following the data entry and editing, was the tabulations of the Basic Tables for the Volume 1 Census Report by the Census and Data processing Team. The 2011 Census report will be composed of two volumes; the Basic tables and administrative report and the Analytical report.

#### **1.4.10 Post – Enumeration Survey (PES)**

For the post-enumeration survey (PES) 12 census blocks were selected: 7 blocks from seven districts in Tongatapu, and 2 blocks from each Ha'apai and Vava'u respectively and 1 from 'Eua. The PES count in some areas recorded slightly less and some more people than counted in the actual census enumeration. While the discrepancy in population numbers of the PES compared to the census enumeration could be explained by most likely explanation is the high mobility (emigration) of the Tongan population during period of the census and PES count.

### **More information**

For more information about the Tonga 2011 Census of Population and Housing, or request additional statistical information from the Census not included in this Volume, please contact the Statistics Department Tonga (STD):
